

SentenceShaper® 2 is now available!

WHAT IS SentenceShaper 2?

SentenceShaper is a novel computer program that helps people with aphasia to communicate in their own voices. Research studies have shown that its impact can be quite striking. This new version targets a variety of linguistic structures with built-in workbooks, which also support speech on topics of personal interest. Personalized materials (importing users' own photos into "electronic scrapbooks", for example) can be created in the Deluxe Edition. The program offers different levels of difficulty and can grow with the user.

PRICE LIST (plus shipping: \$10 USA, \$20 elsewhere)

- **Deluxe Edition - \$650.00** Includes all workbooks and the three user customization tools for editing pages, workbooks, and WordFinders
- **Basic Edition \$450.00** Includes all workbooks, but does not have the three editing tools for customizing materials.

Purchase by credit card from our website, or send a check (in US dollars) to *Psycholinguistic Technologies, Inc., 93 Old York Rd., Suite 1-447, Jenkintown, PA 19046, USA*. Pennsylvania residents please include 6% sales tax.

Purchase orders accepted with prior arrangement.
